

CHORUS **S**MART

EGO SMART

A passionate dialogue
between you and
your home.

GEWISS

EGO WILL REVEAL WHO YOU ARE INSIDE

STYLE EXPRESSES YOUR PERSONALITY.
THE HOME REVEALS YOUR STYLE.

The perfect dialogue
EGO SMART is the meeting point
between design and personality.

THE ENCHANTMENT OF HARMONY

A sophisticated connected ecosystem

With the Connected Smart Home devices of ChoruSmart, GEWISS inaugurates a new range of solutions and connected systems designed to simplify all the home's functions.

The result is an evolved ecosystem that heightens the in-home experience, driving it towards a more engaging, multi-sensorial dimension.

A host of versatile devices, consisting of EGO SMART plates, axial buttons, battery-free ECO push-button panels, connected sensors and actuators, that enhance any action within the domestic environment, expanding the everyday experience and combining practical information along with comfort and automation.

PURITY OF STYLE AND FUNCTIONALITY

Alluring shapes

The plate has evolved. EGO SMART goes beyond pure aesthetics and becomes a functional and interactive element of the home. As attractive as a traditional GEWISS plate, EGO SMART has an additional coloured LED light perimeter illumination system and an integrated graphic display. Visualising data is more stimulating and keeping an eye on the functions of the house even smarter.

Display not visible when the plate is switched off

Opaline profiles for a pleasant, uniform diffusion of light

Reduced thicknesses

Modern lines

Display with dynamic icons and scrolling text messages

Internal LED illumination

Proximity sensor

External LED illumination

The display is dynamic: the text messages scroll on the plate and the icons change shape to indicate the various commands activated. A band of coloured light lights up the edges: each colour has a different significance.

UNIQUE ELEGANCE, INFINITE POSSIBILITIES

All the functions at a glance

With EGO SMART all it takes is a glance to manage and monitor all the home's environments. The plate dialogues with the smart devices and sensors present in the home and provides information on the system status and the functions of the commands installed.
A huge leap forward in the quality of daily life.

DETECTED

SAFETY

- Alarm signals
- Water leakage
- Gas and smoke detection
- Exceedance of humidity levels

SUSTAINABILITY

- Efficient management of the home
- Exceedance of consumption thresholds
- Status of loads

MONITORING

- Assistance for home management
- Welcome and goodbye scenarios
- Status of lights (on/off)
- Status of windows (open/closed)

COMFORT

- Stand-by display
- Temperature
- Hour

The plate functionalities may vary based on the connected devices present in the system.

THE POWER OF EMOTION

The details of a memorable design

EGO SMART triggers positive emotions thanks to its clean and simple lines. The slightly curved surface and reduced thickness towards the edges transmit a sensation of balance and purity. The opaline profiles inside the plate, which diffuse LED light, are also offered in the EGO version and add a discreet element of identity. Each detail is designed to ensure attractiveness, personality and clarity of interpretation.

VERSIONS

The plates are offered in two versions:

EGO SMART

Connected, illuminable, equipped with smart display and proximity sensor.

Available both in 3 and 4 modules rectangular shape and in 2 modules square shape for the international standard.

EGO

Traditional, to complete the home system matching the EGO SMART plates.

Available in 1, 2, 3, 4 and 7 modules rectangular shape and 2, 2+2 (horizontal and vertical), 2+2+2 (horizontal) modules square shape for the international standard.

PRECIOUS FINISHING

Three thematic lines of plates to match perfectly with ChoruSmart devices. A total of 12 colours, all with satin finishes:

Soft colours
to match the white satin-finish button key

Neutral colours
ideal with the satin-finish natural beige button key

Dark colours
perfect with the satin-finish black button key

White is the
brash colour of modesty

Tommaso Landolfi - *Writer and poet*

SOFT COLOURS

The emotion of light

Soft colours embody the purest lines in furnishing and design. They add an accent to a wide range of styles, from the most decorative to the most minimal, from the most personal to the most technological.

- **Material:** technopolymer
- **Finish:** satin
- **Suggested pairing:** white satin-finish button key

Steel

Magnetic gray

Clay

Satin white

Beige is not a colour, it is a declaration of balance

Fabrizio Caramagna - *Writer*

NEUTRAL COLOURS

Prestigious by nature

Neutral tones bring warmth, tactile sensations and express an affinity with natural elements. Their sophistication transforms interiors into tasteful and versatile spaces.

- **Material:** technopolymer
- **Finish:** satin
- **Suggested pairing:** natural beige satin-finish button key

Gold

Soft copper

Light bronze

Dark sand

Natural beige

When I find a colour darker than black, I will wear it. But until then, I'm wearing black!

Coco Chanel - Fashion designer

DARK COLOURS

Timeless attraction

The dark colours offer mystery and seduction. Their tones add strength, highlight contrasts and satisfy those seeking timeless luxury and sophistication.

- **Material:** technopolymer
- **Finish:** satin
- **Suggested pairing:** black satin-finish button key

Brown shade

Copper

Satin black

A TOUCH OF LUMINOUS PURITY

Perfect alignment

The button keys are always aligned, even after their activation

Functionality

The button keys control and regulate lights, roller shutters and scenarios and give notification of any anomalies in the loads

Illuminated diffusers

To locate button keys in the dark or to indicate their functions using interchangeable icons

They are completed by any ChoruSmart plate

ONE, GEO, EGO/EGO SMART, LUX and ICE

CONNECTED COMMANDS ACTIVATED AXIALLY

The connected, axially activated control units make the ChoruSmart ecosystem exclusive and alluring. The button keys remain aligned even after they have been pressed. They permit the control of all the home's functions while adding a sophisticated, modern style.

ERGONOMICS

The entire surface of the button key is active. For perfect control, it can be enabled at any point: top, bottom or in the middle.

Reduced stroke

Axial control units have a limited movement range as they act on microswitches

Tactile comfort

Thanks to the reduced stroke of the button keys, and the lightness of pressure required to activate them

Low noise

The soft-click activation is similar to that of digital controls

Modularity

One-module button keys are practical and space-saving, two-module button keys are ideal for activating frequently used commands

RANGE

Axial commands offer a very broad range of versions, modularities, colours and finishes.

Connected control units

With embedded radio module and auxiliary inputs to connect non-smart devices and double their functions

Traditional auxiliary control units

To extend and replicate the control of the connected modules

Available in five colour variations

Two with a glossy finish: white and titanium, and three with a satin finish: white, natural beige and black

MORE FUNCTIONS IN LESS SPACE

Smart solutions for your home

The connected axial control units are smart devices with innovative features: in addition to their original function they are able to add new functions and control points to the home system, without requiring additional installation spaces. In addition, when used in a EGO SMART plate, with **SHIFT mode** activated, the functionality of the control units doubles.

Up to 4 controls in 1
• Connected 2-way switch module

Up to 5 controls in 1
• Connected dimmer module
• Connected roller-shutter module

Up to 6 controls in 1
• 2 commands connected module

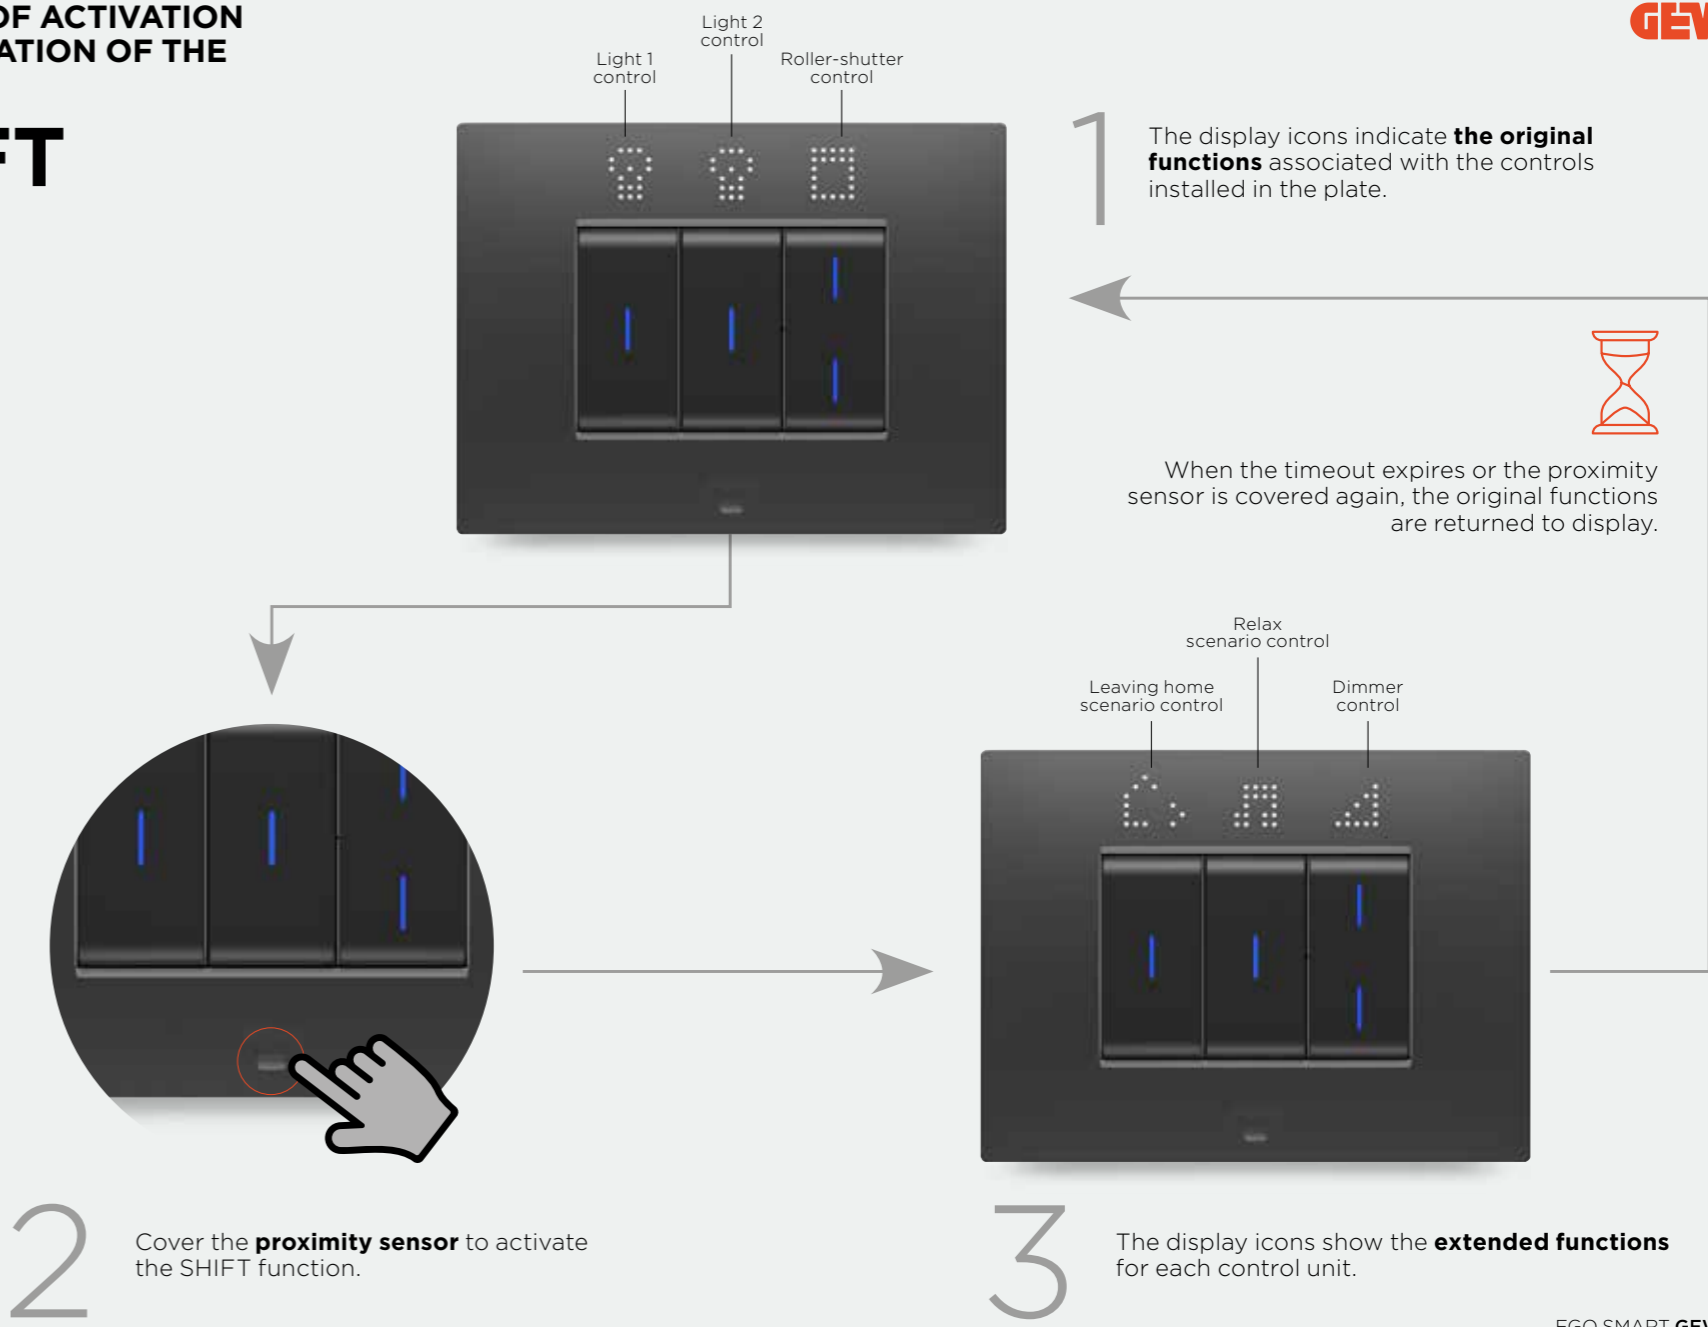

- Each connected control unit can perform many more functions than any other:**
- Control the associated load (eg: lights, dimmer, blinds, etc.).
 - Control additional functions to the original functions (with EGO SMART plate and SHIFT mode activated).
 - Replicate the command or send generic wireless commands to the system (eg: scenarios), thanks to the option of connecting up to 2 traditional control units (non-smart).
 - Replicate the command or send generic wireless commands to the system (eg: scenarios), thanks to the option of connecting up to 2 traditional control units (non-smart).

EXAMPLE OF MULTI-FUNCTIONALITY: 5 CONTROLS IN 1

CONNECTED SMART HOME

The evolution of the traditional system

Connected Smart Home by ChoruSmart offers innovative solutions for the advanced connectivity requirements of today's home. The traditional wired system is enhanced by the addition of radio technology, used to connect all smart devices, creating a unique and up-to-date experience for each user. Controlling lights, roller shutters, motorised awnings and controlled sockets, managing scenarios and temperature, visualising consumption and historical trends **has never been easier and safer thanks to Connected Smart Home solutions.**

ALARM SIGNALLING

Receive alarm notifications on your smartphone and on the EGO SMART plate display. For example: in the event of water leakages, gas leakages or a window left open.

CONTROL VIA SMARTPHONE

You can control and manage every room via your smartphone and the Home Gateway App, even when you are away from home.

VOICE COMMANDS

Using your favourite voice assistant – Alexa or Google Assistant – you can manage your home with simple voice commands. Also ideal for people with mobility and functional impairment.

UPDATABLE AND SCALABLE SYSTEM

Thanks to wireless technology, the devices in the Smart Home Connected range allow you to add new functions to a traditional system, without any need for masonry work, like the ECO push-button panel that does not require a power supply or electrical connections. It is the ideal solution for systems that need to be renovated, and for new systems.

ENERGY CONSUMPTION

Consumption, historical trends and load control can be displayed in real time.

TEMPERATURE CONTROL

For optimum comfort, you can control the temperature in your home and intervene even if you are out of the house.

YOUR HOME IN YOUR HAND

One App for the whole house

The Home Gateway app allows you to manage your entire home, from system configuration to operation. A single App for professional and user.

Thanks to modern and streamlined graphics

Thanks to access to each function with a maximum of two taps on the display

Thanks to the scrolling Home Page where the whole house can be monitored at a glance

WiFi zigbee

Home Gateway

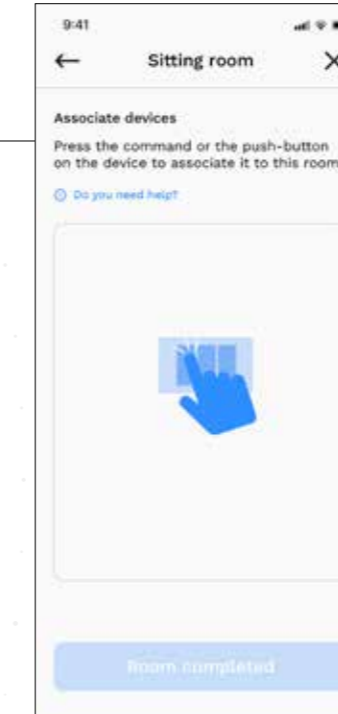

Home Gateway App

System configuration

A simple and intuitive, guided installation, to associate each connected device to the home system.

Choice of graphic icons to be associated with the devices installed and display them on the EGO SMART plates

Customisation of the LED backlighting colours for the EGO SMART plates and settings for night and stand-by operating modes

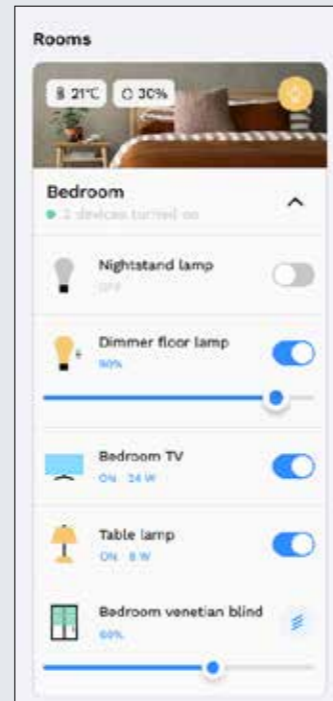

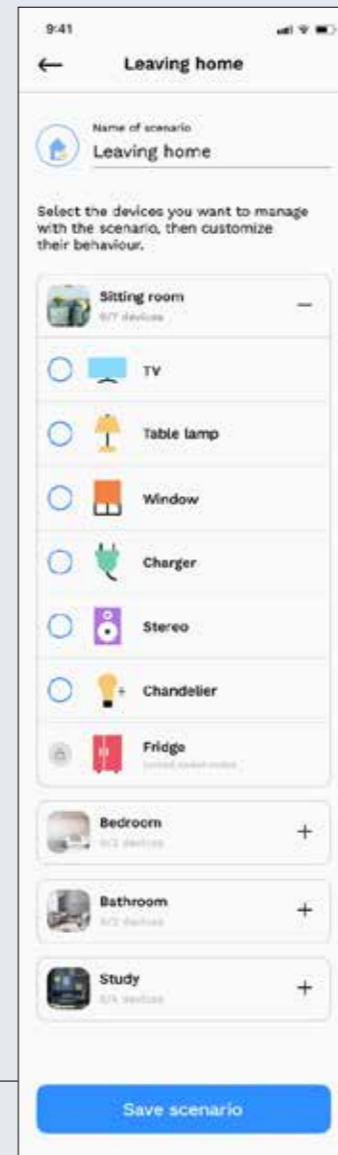

USING IT IS CHILD'S PLAY

What you can do with the App

Monitor the overall consumption of the house or individual appliances

Receive notifications about the status of the system and individual connected loads

Customise and run a great number of scenarios (up to 16)

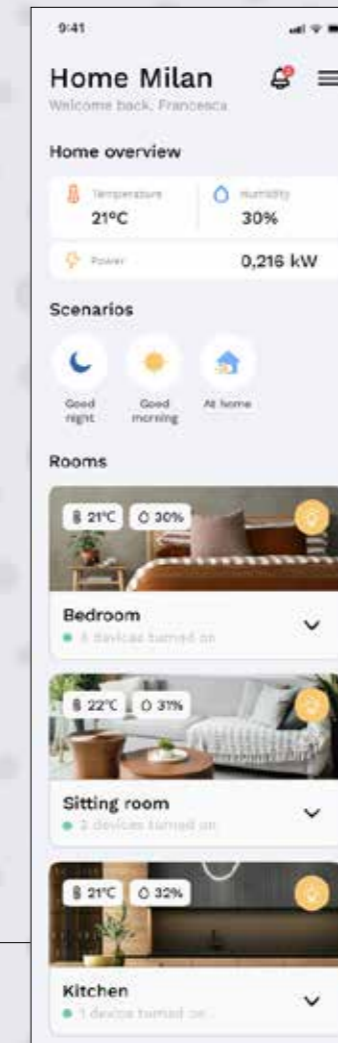

Manage and control the status of lighting, controlled sockets, roller shutters and motorised awnings

View information about sensors and technical alarms

Customise the App with pictures of the house used as background images for each page

Manage every function inside and outside the home

A unique solution for every style. Timeless

FLEXIBLE

A combination of colours, materials, finishes and shapes that use the same support. A mosaic of technology, elegance and performance that satisfies every taste and need, whatever configuration is chosen and installed.

SCALABLE

A complete domestic range, able to satisfy all application and function needs. It guarantees solutions ranging from Traditional to Connected Smart Home and Home&Building Pro. It offers numerous building control options, from traditional push-button control units - axial, rocker or soft-click - to touch buttons, and from connected control units to voice commands and the convenience of app-based controls.

CONNECTED

The Connected Smart Home solutions offer a wide and complete variety of smart functions for residential applications, with intuitive user control. Ideal for both new buildings and renovations.

SUPPORTS FOR PLATES

Standard support for rectangular boxes, robust and compact, suitable for all the plates: **ONE, GEO, EGO, LUX and ICE.**

Smart support for rectangular boxes, durable yet slimline, optimised for the **EGO SMART** plates. Also compatible with the rest of the ChoruSmart plates.

BUTTON KEYS

Axial button keys

Rocker button keys

Axial and rocker button keys are compatible with all supports (smart and traditional) and with all the ChoruSmart plates.

ChoruSmart combines Italian design, cutting-edge technology and advanced features.
